

Clutch gear seal

The seal mounts in the extension, or directly in the 1967-70 clutch gear.

37531-56B 1956 from serial number 56KH-1465 to 66 all, 1967 to 1969 XLCH

12021 1967-1970 XLH, 1970 XLCH

The clutch gear seal keeps oil out of the dry clutch.

It is used from 1956 serial number 56KH-1465. The 1967 dry clutch electric start clutch gear takes a bigger seal. Wet clutch Iron Sportsters do not use any seal.

37531-56B on left, near the early model dry-clutch gear with the extension pressed in. The 12021 is on the right. It is bigger and goes directly in the electric start dry clutch gear above it.
