

Shifter bolt

This bolt holds the shifter assembly to the trap door assembly.

**Stud
1952 K-model**

**4621
1953-1984**

The first-year K-model used a stud extending from the shifter holder. This required a flat washer, a lockwasher, and a nut.

All later years substitute a lock tab for the lockwasher, and dispense with the nut and flat washer.

The Iron Sportster trap door assembly holds the mainshaft, countershaft, and shifter mechanism.

The Iron Sportster shifter comes as the 34009-52 assembly.
