

Shifter pawl right

The plate keep the early model shifter pawl plungers in place.

34478-53
1952-1971

The Iron Sportster trap door assembly holds the mainshaft, countershaft, and shifter mechanism.

The Iron Sportster shifter comes as the 34009-52 assembly.

34478-53

1952-1971

This plunger is the mate to the left one, It ratchets the shifter plate around, which moves the shift forks. There is no part for the 1972 design since that design uses two identical parts that are covered in the Shifter Pawl Left part page.

Another view of the part.
