

slynde's 1959 XLCH Sportster barn fresh

This is my 1959 XLH Sportster.

The trained eye can see this is a XLH engine in a XLCH frame. It's been together this way a very long time.

Engine turns over with compression, but it has not been started. Last registered in 1979. The tank appears to be a 1957-8. It is mostly OEM stuff, except the seat and pillion. This bike is loaded with early Sportster stuff.
