

cholm152's 1964 Sportster XLCH hardtail

I gave it a KR, XR style flat tracker look. The bike is all fresh.

This 1964 Harley Sportster XLCH, has clean Harley title in my name. It took me a little over 14 months to finish this thing. The engine is rebuilt top to bottom, and runs great. It has an S&S Super B carb with velocity stack, a magneto, an early Sportster 33mm front end, early Sportster front and rear drum brakes.

It has a KR style hardtail, KR, XR style pipes, KR, XR style primary cover. Comes with a hard-to-find XLCH horseshoe oil tank, House of Kolor red metalflake paint with 2-tone pearl white, 19-inch wheels front and back, brand new tires front and back, new generator, new voltage regulator, it runs and rides great.
