

andraandrudy's 1966 Sportster XLCH

This 1966 Harley-Davidson Sportster XLCH is the ultimate street machine.

A true American Icon. It is a very sanitary machine.

The 1960's were a special time for the Sportster, establishing many land-speed and drag racing records. The XLCH was a limited production model and difficult to obtain. This is a fresh, complete restoration, with a rebuilt motor and transmission. There is new wiring and generator.

The bike has NOS (new old stock) tapered exhaust, alloy wheels, polished stainless spokes, a velo-racer post seat, and Smith's instruments. All factory body and chassis parts, and sheet metal are outstanding. The crankcases are pristine.
