

motorcyclemichaels' 1971 Sportster XLCH custom

This bike is a dream for the true vintage Sportster enthusiast.

It was completely restored from the ground up with the finest detail. A champion all around, it turns heads and gets compliments wherever you take it. We have receipts verifying nearly \$9000 in modifications & restoration. This very smooth and powerful bike runs excellently and is the real thing. A cool classic that is ready to ride. The motor has polished cases and covers, chrome

Allen bolts, 425 lift cams, S & S Super E carb, Daytona Twin Tech single fire ignition, powder-coated heads and cylinders, new generator, o-ring chain, and much more. Steel chrome wheels with stainless spokes, all new bearings and races, tank and fenders are new, gloss black with clear coat, matching motor and frame numbers. Frame is blasted and powder-coated, XLCR

swingarm modified for disc brake and shock location, 39mm HD Storz forks, Progressive rear shocks, Lapera Naugahyde solo saddle, Performance Machine calipers and hand controls, more. No speedo but I rode it 2,000 miles to break it in. It has the best of everything along with new Klotz full synthetic 60w oil.
