

## panjoe's 1971 springer rigid bobber

This is my 1971 Harley-Davidson Sportster XLH.  
It has a home-made paint job.

The bike is in good shape. I got a fresh motor and trans rebuild last year. It features a powder-coated engine side covers and a Paughco springer front end. It sports a custom CCI gas tank. I installed a new battery, starter, and regulator. Its got both electric start and kick start. It has red powder-coated rims with chrome spokes. I kept the points ignition and run a Mikuni carburator. I put a GMA front caliper with polished disc on

the front end.
