

harleysoftailazman's 1981 Sportster XLH

This bike was bought by my wife in AZ against my will 4 years ago.

This is a 1981 Harley Davidson Sportster. I refuse to put in more money in this bike. This is a list of the work completed on the bike: new carb kit (K&N); new ignition system; new gasket seal kit; new battery; 2 new tires; 2 new tubes; new throttle cable; new point cover; speedometer head; new battery box

The parts came to \$1100.00, then the bike was sent out for a paint job which was another \$700.00. The wiring was repaired and replaced as needed. The shocks were bought for another 220.00 and all this does not count the labor. I will be taking the bike out for a spin. I'm gonna put clean gas in the bike, but it does leak oil.
